ADMINISTRATION SERVICES

established 2006

“Achieving sustainable long-term success through a dedicated strategic partnership with our clients, their funds and investors.”

# About Us

---

Taurus has been active in the accounting and fund administration business since its establishment in 2006, providing a comprehensive suite of accounting, fund administration and corporate services, to a range of investment funds and other commercial entities.

Our experienced team is made up of qualified, multi-lingual professionals and we pride ourselves in delivering a professional, competitive, efficient and timely service to our valued clients. At Taurus, we are committed to offer a tailored service with a personal approach to our clients' needs as well as the regulatory and investment environment within the relevant jurisdictions.

We administer a diverse portfolio of investment funds and collective investment schemes including hedge funds, mutual funds, property funds, feeder funds, multi-share classes funds, funds with various segregated portfolios that follow various investment strategies.

# Fund Accounting Software

---

We service our fund clients using our core system Pacific Fund System's PAXUS ("PAXUS").

PAXUS is a world leading specialist accounting and administration application system designed specifically for the alternative fund administration industry. PAXUS is a robust and reliable market-leading system that replaces a number of systems and processes including the securities portfolio, valuation, allocation system, general ledger, fee calculation and share registry module in one state-of-the-art integrated solution.

Taurus Administration Services Limited has been using PAXUS for a number of years and has benefitted from increased quality delivery, quicker valuation reporting, ability to deal with various complex funds and structures including multi-currency and multi-share class, increased overall efficiency, reduced risk of error and saving of significant IT costs.

Taurus Administration Services Limited ensures that the highest standards of IT security and data protection are met. All our information systems are subject to robust information security management.
